SOAPSTONE SUMMER HOMES SUBDIVISION FIRE DISTRICT PLAN
 August 2007

- Roads shown are in their approximate existing locations, but are not to scale. Actual road widths vary from those shown. This plan is for illustrative purposes only.
- Fire apparatus turn rounds and pull outs shown utilize existing roads and cabin drive ways. Soapstone HOA proposes minor right-of-way adjustments to be used as vehicle pull-outs to allow fire apparatus vehicles ingress to, and egress from the subdivision.
- Road side vegetation along primary access roads will be trimmed to provide a 20 foot clear width for fire apparatus access. The Soapstone HOA commits to clearing 1000 linear feet of road side vegetation per year until all roads meet with the 20 foot clear width, and will maintain on an annual basis thereafter.
